

Large Cap Sustainable Growth Portfolio

Third Quarter 2016

Portfolio Review

The Large Cap Sustainable Growth Portfolio outperformed the Russell 1000 Growth Index during the third quarter. For the quarter, the portfolio benefited from strong stock selection in the consumer-discretionary sector and strong stock selection and an overweight in the information-technology sector, while negative stock selection in health care and an overweight in consumer staples detracted from performance.

Holdings that contributed the most to performance during the quarter were Facebook and Alibaba. Facebook continues to grow advertising revenue and take share in the online digital marketing space. The company delivers an unprecedented global reach of 20% of the earth's population to advertisers in a very measurable (return on investment) way. Monetization of this audience has barely scratched the surface of its long-term potential. Despite reaching a revenue run rate greater than \$25B, Facebook's second quarter growth rate accelerated again to 59%. Ad revenue soared as mobile monetization continued to rapidly improve and user engagement remained incredibly robust. Alibaba's two marketplaces, Taobao and Tmall.com, combine to form the largest online commerce company in the world by gross merchandise value (GMV). In recent quarters, GMV growth has reaccelerated and improved mobile monetization (better now than desktop) and has led to even faster growth in revenue. Management has laid out a number of social commerce initiatives to further improve mobile monetization over time. Alibaba's marketplaces have significant network effects and the company is fostering the ecosystem with investments in payments and logistics partnerships.

Holdings that contributed the least to performance were Bristol-Myers Squibb Company and Monster Beverage. To this point, Bristol-Myers has dominated the initial immuno-oncology (I/O) market, securing a market share over 80%. The company is working on combination therapies with a very broad set of checkpoint inhibitors which we believe will provide a more comprehensive and sustainable treatment for cancer. However, a failed trial in first-line lung cancer (based more on trial design than on drug effectiveness) and positive results from competitors have led analysts to adjust assumptions for Bristol's ultimate market share and pricing power. Quarterly results for Monster Beverage remain erratic as the company continues transitioning its global distribution agreements to Coke bottlers, the majority of which should be completed by the end of the year. Once the Coke bottler transition is complete, we believe this new partnership will accelerate Monster's domestic and international sales resulting in many years of profitable growth ahead. As a result, we remain owners of the business.

Outlook

As we enter the final quarter of the year, investors face a multitude of uncertainties in the short term that could lead to market volatility, including the upcoming presidential election and prospects that the Fed will raise interest rates. However, we do not believe either will have a meaningful impact on equity prices over the long term. It is important to remember that even the President of the United States has limits to his/her power with checks and balances from the legislative and judicial branches of our government. Additionally, future interest-rate increases by the Fed are intended to "normalize" rates and give the Fed more room to maneuver in the future, and are not intended to shut down an overheated economy. We believe the best solution for investors is to focus on high-quality securities which should generate favorable returns amid rising markets and provide downside protection in more volatile periods.

Large Cap Sustainable Growth Portfolio

Third Quarter 2016

Disclosure

Kayne Anderson Rudnick Investment Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Kayne Anderson Rudnick Investment Management, LLC has been independently verified for the period from January 1, 1999 through December 31, 2014. The verification reports are available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. Verification does not ensure the accuracy of any specific composite presentation.

Kayne Anderson Rudnick Investment Management, LLC, a wholly owned subsidiary of Virtus Investment Partners, Ltd., is a registered investment advisor under the Investment Advisers Act of 1940. Registration of an Investment Advisor does not imply any level of skill or training. Kayne Anderson Rudnick Investment Management, LLC manages a variety of equity and fixed-income strategies focusing exclusively on securities the firm defines as high quality.

The composite includes all fully discretionary institutional and pooled Large Cap Sustainable Growth Portfolios. Large Cap Sustainable Growth Portfolios are invested in equity securities with

market capitalizations consistent with the Russell 1000® Growth Index, that have market control, rising free cash flow, shareholder-oriented management, strong consistent profit growth, and low-debt balance sheets. For comparison purposes, the composite is measured against the Russell 1000® Growth Index. The Russell 1000® Growth Index is a market capitalization-weighted index of growth-oriented stocks of the 1,000 largest companies in the Russell Universe, which comprises of the 3,000 largest U.S. companies. The index is calculated on a total-return basis with dividends reinvested. Benchmark returns are not covered by the report of the independent verifiers. The composite was created in January 2012. A list of composite descriptions and policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. This composite contained 8% non-fee-paying portfolios as of December 31, 2013 and 0.1% non-fee-paying portfolios as of December 31, 2014.

The standard management fee schedule currently in effect is as follows: 0.70% for the first \$10 million; 0.55% on the next \$25 million; 0.45% on the next \$50 million; 0.35% on the balance. Actual management fees charged may vary depending on applicable fee schedules and portfolio size, among other things. Additional information may be found in Part 2A of Form ADV, which is available on request. The performance information is supplied for reference. Past performance is no guarantee of future results. Results will vary among accounts. The U.S. dollar is the currency used to express

performance. Returns are presented gross of management fees and withholding taxes, and net of transaction fees and include the reinvestment of all income. Gross returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Model net returns have been calculated by deducting 1/4th of the highest tier of the standard management fee schedule in effect for the respective period from the gross composite returns on a quarterly basis.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns for accounts in the composite for the entire year. For those years when less than five accounts were included for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation measures the variability of the composite (using gross returns) and the benchmark for the 36-month period ended at the following dates:

3-Yr Annualized Standard Deviation (%)

December 31	Composite	Benchmark
2014	10.39	9.73
2015	12.33	10.85

Year	Total Firm Assets (\$ millions)	Total Composite Assets (\$ millions)	Accounts at Year End	Gross Annual Return (%)	Net Annual Return (%)	Russell 1000® Growth Index Annual Return (%)	Internal Dispersion
2012	6,545	583	24	14.76	13.96	15.26	0.03
2013	7,841	674	25	30.66	29.78	33.48	0.08
2014	7,989	681	25	12.66	11.86	13.05	0.14
2015	8,095	687	31	10.43	9.68	5.67	0.35
