

Mid Cap Core Portfolio

Fourth Quarter 2017

Portfolio Review

The Mid Cap Core portfolio outperformed the Russell Midcap Index during the fourth quarter. The outperformance was driven largely by strong stock selection in the health care and consumer discretionary sectors. Performance was hurt by negative stock selection in financial services and technology.

The biggest contributors to performance were Globus Medical and Monster Beverage.

Globus Medical saw its shares rise after underperforming in the previous quarter. Its sales force has ramped up nicely and driven revenues as new products from its robotics offerings begin to bear fruit.

Monster Beverage suffered several quarters of erratic financial performance due to the transition into the Coke global distribution network and some production hiccups in the U.S. However, those headwinds appear to be dissipating as recent quarterly results showed a pickup in revenue growth in both the U.S. and international markets. We think the upswing in domestic markets is sustainable, and, as the company gains scale from increased international distribution via Coke, profits should increase meaningfully.

Names that detracted the most from performance were Cooper Companies and Skyworks Solutions.

Cooper shares underperformed in the quarter as the growth rate in revenues in its vision segment slowed relative to that of the overall U.S. market. We believe this is partially explained by the more difficult comparison Cooper had versus last year than did the market.

Skyworks reported solid results this quarter, but it remains very closely tied to Apple iPhone results. iPhone revenue accounts for 40% of Skyworks' business, and rumors around softer sales of the new flagship iPhone X impacted Skyworks' stock this quarter. While the company has been working to diversify away from Apple, the content gains it achieves in each iteration have made that transition challenging. Some bumpiness in Chinese smartphone demand also impacted the stock.

Purchases and Sales

During the quarter, we purchased Manhattan Associates and Houlihan Lokey. We closed our positions in Church & Dwight and RLI.

Manhattan is a vertical software provider that focuses on complex supply chain and omni-channel solutions. Despite the volatility in its retail customer base, the company continues to grow both top- and bottom-line results. Operating margins grew on average by 3% the last five years. While such growth is set to moderate, the company believes it still has margin expansion ahead. With a growing presence internationally, we are likely still in the early stages of a broad supply chain technology roll-out.

Houlihan Lokey is a global investment bank that provides financial advisory, restructuring and capital raising services. The firm has a culture and brand that differentiates it in the marketplace, which has translated into high employee retention and consistent market share gains over the years. With only a 2% market share today in its target middle-market, there is ample opportunity for the business to grow.

Church & Dwight announced it was acquiring Water Pik, a leading manufacturer of oral water flossers and replacement showerheads, marking the largest acquisition in its history. With little or no synergies expected in manufacturing and marketing and distribution, the deal diverges from Church & Dwight's traditional integration approach. We expect the Water Pik acquisition to pressure profitability and increase execution risk. Also, there has been a strategic shift in management's approach to capital allocation. Given these considerations and a lofty valuation of the stock, we exited our small position in the company.

The shares of RLI have been relatively stagnant in the last year along with muted premium growth and a re-underwriting of the transportation book. While the company remains a solid underwriter and has a stellar combined ratio, we sold our position due to the valuation ceiling and the slow top-line performance.

Outlook

The outlook for 2018 is favorable overall, but to expect another 2017 would be unreasonable. More volatility and drawdowns are anticipated in 2018 as markets return to more normal conditions. 2018 should continue to provide investors with mid-to-high single-digit equity returns but most likely not without a bumpy ride along the way. Investors should review their asset allocation and make sure they can "sleep at night" with their current equity exposure. We will continue to own high-quality businesses that can shine in good and bad times and have competitive protections.

Mid Cap Core Portfolio

Fourth Quarter 2017

Disclosure

Kayne Anderson Rudnick Investment Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Kayne Anderson Rudnick Investment Management, LLC has been independently verified for the period from January 1, 1999 through December 31, 2016.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The Mid Cap Core Composite has been examined for the period from January 1, 2000 through December 31, 2016. The verification and performance examination reports are available upon request.

Kayne Anderson Rudnick Investment Management, LLC, a wholly owned subsidiary of Virtus Investment Partners, Inc., is a registered investment advisor under the Investment Advisers Act of 1940. Registration of an Investment Advisor does not imply any level of skill or training. Kayne Anderson Rudnick Investment Management, LLC manages a variety of equity and fixed-income strategies focusing exclusively on securities the firm defines as high quality.

The composite includes all fully discretionary institutional and pooled Mid Cap Core Portfolios. Mid Cap Core Portfolios are invested in equity securities with market capitalizations consistent with the Russell Midcap® Index, that have market

control, rising free cash flow, shareholder-oriented management, strong consistent profit growth and low-debt balance sheets. For comparison purposes, the composite is measured against the Russell Midcap® Index. The Russell Midcap® Index is a market capitalization-weighted index of the 800 smallest companies in the Russell 1000® Index, which comprises the 1,000 largest U.S. companies. The index is calculated on a total-return basis with dividends reinvested. Benchmark returns are not covered by the report of the independent verifiers. The composite was created in January 2000. Previously, only institutional accounts were included. A list of composite descriptions and policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

Prior to January 1, 2011, the composite minimum was \$250,000. As of January 1, 2011, the composite was redefined to include both institutional and mutual fund [or pooled] accounts. Prior to January 1, 2011, accounts that experienced a significant cash flow, defined as aggregate flows that exceeded 25% of the account's beginning of period market value, were temporarily removed from the composite.

The standard management fee schedule currently in effect is as follows: 0.75% for the first \$25 million; 0.65% on the next \$25 million; 0.55% on the next \$50 million; 0.50% on the balance. Actual management fees charged may vary depending on applicable fee schedules and portfolio size, among other things. Additional information may be found in Part 2A of Form ADV, which is available on request. The performance

information is supplied for reference. Past performance is no guarantee of future results. Results will vary among accounts. The U.S. dollar is the currency used to express performance. Returns are presented net of transaction fees and include the reinvestment of all income. Gross returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Model net returns have been calculated by deducting 1/12th of the highest tier of the standard management fee schedule in effect for the respective period from the gross composite returns on a monthly basis.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns for accounts in the composite for the entire year. For those years when less than five accounts were included for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation measures the variability of the composite (using gross returns) and the benchmark for the 36-month period ended at the following dates:

3-Yr Annualized Standard Deviation (%)		
December 31	Composite	Benchmark
2011	17.51	21.86
2012	15.39	17.44
2013	12.53	14.23
2014	10.29	10.29
2015	11.96	11.00
2016	12.31	11.72

Year	Total Firm Assets (\$ millions)	Total Composite Assets (\$ millions)	Accounts at Year End	Gross Annual Return (%)	Net Annual Return (%)	Russell Midcap® Index Annual Return (%)	Internal Dispersion
