

Global Dividend Yield Portfolio

Second Quarter 2020

Portfolio Review

The Global Dividend Yield portfolio underperformed the MSCI World High Dividend Yield Index in the second quarter. Poor stock selection in financials and poor stock selection and an overweight in real estate detracted from performance. An underweight in consumer staples and good stock selection and an underweight in health care helped to offset some of the underperformance.

The biggest contributors to performance during the quarter were Patterson Companies and Spark New Zealand.

- COVID-19 significantly impacted Patterson's dental business, with most dental practices being shut down for several weeks. Concerns related to a total shutdown of one of the company's key customers negatively impacted the stock in March. However, as the economy stabilized and re-opened we have seen people going back to the dentist. In late June, the company reported better-than-anticipated results and made a strong commitment to maintain the dividend.
- Strong business results, a commitment to the dividend and a very strong containment of COVID-19 in New Zealand all contributed to a strong quarter for Spark New Zealand.
- Other top contributors included Cisco Systems, Watsco and Fastenal.

The biggest detractors from the portfolio were Lamar Advertising and WPP.

- Lamar's customers tend to be smaller, local businesses that have been particularly hard hit during COVID-19. The severity and length of the downturn could result in an extended period of lower-than-anticipated revenue, which will have a significant impact on the company's cash flow and ability to pay its dividend. As a result, we sold our shares early in the quarter. The company subsequently reduced its dividend by half.
- Since the onset of COVID-19 the advertising industry has seen significantly stronger disruption than it normally experiences during recessionary periods. As a result, WPP suspended the dividend that it had announced in February. The current environment may weigh on the industry for an extended period of time and may negatively impact future dividends. As a result, we sold our shares early in the second quarter.
- Other bottom contributors included Realty Income, Pfizer and Tokio Marine Holdings.

Purchases and Sales

During the quarter, we purchased 3M Company, Analog Devices, Eastman Chemical, Fastenal, Johnson & Johnson, Leggett & Platt, Pfizer, PNC Financial Services Group, Snap-On and Verizon Communications. We sold Compass Group, Lamar Advertising, Las Vegas Sands, Realty Income, Sabre Insurance, Smith, TietoEVRY, Tryg and WPP.

Outlook

Although the market has greatly recovered this quarter, we do not believe it is anticipating a robust economic recovery as many market commentators have suggested. If businesses were to get back to normal quickly, then many of the hardest hit areas in the stock market would not be 40% to 80% off of their 52-week highs set over the last year when the economy was not in a recession. Additionally, with the 10-year yield at a paltry 0.65% and the yield curve with only a slightly positive slope, this suggests a modest but not robust recovery. While there continues to be above-average uncertainty (second wave risk, election results, and economic recovery timeline) in the near term, we continue to believe our time-tested strategy of owning quality companies will continue to be rewarded over the long haul.

Global Dividend Yield Portfolio

Second Quarter 2020

Disclosure

Kayne Anderson Rudnick Investment Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Kayne Anderson Rudnick Investment Management, LLC has been independently verified for the period from January 1, 1999 through December 31, 2018.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The Global Dividend Yield Composite has been examined for the period from January 1, 2014 through December 31, 2018. The verification and performance examination reports are available upon request.

Kayne Anderson Rudnick Investment Management, LLC, a wholly owned subsidiary of Virtus Investment Partners, Inc., is a registered investment advisor under the Investment Advisers Act of 1940. Registration of an Investment Advisor does not imply any level of skill or training. Kayne Anderson Rudnick Investment Management, LLC manages a variety of equity and fixed-income strategies focusing exclusively on securities the firm defines as high quality.

The composite includes all fully discretionary institutional and pooled Global Dividend Yield Portfolios. Global Dividend Yield Portfolios are invested in globally diversified securities of high-

quality, mature companies with high dividend yields. For comparison purposes, the composite is measured against the MSCI® World High Dividend Yield Index. The MSCI® World High Dividend Yield Index is designed to reflect the performance in the MSCI® World Index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent. The benchmark was changed retroactively effective January 2019, as the previous benchmark was discontinued December 2018. Benchmark returns are not covered by the report of the independent verifiers. The composite was created in January 2012. A list of composite descriptions and policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

This composite contained 100% non-fee-paying portfolios as of December 31, 2012, 60% non-fee-paying portfolios as of December 31, 2013, 4% non-fee-paying portfolios as of December 31, 2014, 2% non-fee-paying portfolios as of December 31, 2015 and < 1% non-fee-paying portfolios as of December 31, 2016, December 31, 2017 and December 31, 2018.

The standard management fee schedule currently in effect is as follows: 0.70% for the first \$10 million; 0.55% on the next \$25 million; 0.45% on the next \$50 million; 0.35% on the balance. Actual management fees charged may vary depending on applicable fee schedules and portfolio size, among other things. Additional information may be found in Part 2A of Form ADV, which is available on request. The performance information is supplied for reference. Past

performance is no guarantee of future results. Results will vary among accounts. The U.S. dollar is the currency used to express performance. Returns are presented net of transaction fees and include the reinvestment of all income. Gross returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Model net returns have been calculated by deducting 1/12th of the highest tier of the standard management fee schedule in effect for the respective period from the gross composite returns on a monthly basis.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns for accounts in the composite for the entire year. For those years when less than five accounts were included for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation, which measures the variability of the composite (using gross returns) and the benchmark for the 36-month period, is not presented for periods prior to 2014 because 36 monthly composite returns are not available.

3-Yr Annualized Standard Deviation (%)

	December 31	Composite	Benchmark
2014		8.95	10.59
2015		10.15	11.32
2016		9.32	10.61
2017		8.00	9.59
2018		8.23	9.14
