

Mid Cap Sustainable Growth Portfolio

Second Quarter 2023

Portfolio Overview

The Mid Cap Sustainable Growth portfolio outperformed the Russell Midcap Growth Index in the second quarter. Good stock selection in consumer staples and information technology contributed positively to performance. Poor stock selection in health care and an underweight in industrials detracted from performance.

The biggest contributors to performance during the quarter were Celsius Holdings and MongoDB.

- In the first quarter of 2023, Celsius Holdings reported it had spent heavily in conjunction with its distribution deal causing it to miss fourth quarter 2022 numbers. The company normalized its spending just one quarter later. Revenue growth was broad-based with older channels still growing and newer channels now contributing to revenue.
- Since all artificial intelligence (AI) applications need data at their core in a format that is easy to access and manipulate, we believe MongoDB's document database is uniquely positioned to be a key beneficiary of the AI revolution. During the quarter, the company announced strong growth in customers and launched a suite of new enabling products.
- Other top contributors included SiteOne Landscape Supply, BILL, and The Trade Desk.

The biggest detractors from the portfolio during the quarter were MarketAxess and Mettler-Toledo International.

- MarketAxess has seen its market share in the core U.S. high-grade market continue to deteriorate, offsetting the success it is having in other credit products. It appears that a competitor that offers a broader platform for trading fixed income securities is successfully encroaching on MarketAxess's market share.
- Mettler-Toledo International declined in the quarter as constrained spending from its customers led to a miss in its Lab segment and the company moderated its guidance for the segment for the year. We remain optimistic about the company given its pricing power and burgeoning sources of demand for building and developing lithium-ion batteries and sustainable polymers.
- Other bottom contributors included MercadoLibre, STAAR Surgical, and Silk Road Medical.

Outlook

Inflation data continues to head in the right direction, which we believe may set the stage for little to no further short-term interest rate increases from here. If you exclude the P/E ratios of the top 7 companies in the S&P 500 Index, valuations decline to the 13-to-17x earnings for the rest of the market. This valuation backdrop can help offset any mild decline in earnings even if the economy does slip into a mild or shallow recession. We have seen some improvements in breadth over the last half of this quarter, but not robust enough yet to call it a trend. If breadth expands, this would be a positive sign for equities.

*KAR utilizes the interquartile method when calculating Debt/EBITDA. The interquartile method excludes outliers from an aggregate statistic such as weighted average. The interquartile method does not assume that data from the top or bottom of the distribution are outliers--only the extreme ends are excluded--and that it can be applied consistently as a quantitative method for most fundamental characteristics. Debt/EBITDA utilizes net debt for the calculation.

†Free cash flow data is as of March 31, 2023. Prices are as of June 30, 2023. Excludes financials.

Data is obtained from FactSet Research Systems and BNY Mellon and is assumed to be reliable. Other principal consultant firms may use different algorithms to calculate selected statistics. Estimates are based on certain assumptions and historical information. **Past performance is no guarantee of future results.**

Peer Comparison Chart

Annualized Gross Returns Ending June 30, 2023

The eVestment Mid Cap Growth Universe includes 84 managers categorized in the mid cap growth asset class by eVestment. KAR does not pay any fees to be included in the eVestment Mid Cap Growth Universe or for the ranking itself. KAR does pay fees for the use of certain products and services provided by eVestment. eVestment rankings are based on gross of fee returns. Gross of fee returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Management fees are described in KAR's Form ADV Part 2A, which is available upon request and can also be found at <https://kayne.com/wp-content/uploads/ADV-Part-2A.pdf>. Returns could be reduced or losses incurred due to currency fluctuations. **Past performance is no guarantee of future results.**

KAR (as defined below) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. KAR has been independently verified for the period from January 1, 1999 through December 31, 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis.

The Mid Cap Sustainable Growth Composite has had a performance examination for the period from January 1, 2012 through December 31, 2022. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Kayne Anderson Rudnick Investment Management, LLC ("KAR"), a wholly owned subsidiary of Virtus Investment Partners, Inc., is a registered investment advisor under the Investment Advisers Act of 1940. Registration of an Investment Advisor does not imply any level of skill or training. KAR manages a variety of equity and fixed-income strategies focusing exclusively on securities the firm defines as high quality.

The composite includes all fully discretionary institutional and pooled Mid Cap Sustainable Growth Portfolios. Mid Cap Sustainable Growth Portfolios are invested in equity securities with market capitalizations consistent with the Russell Midcap® Growth Index, that have market control, rising free cash flow, shareholder-oriented management, strong consistent profit growth and low debt balance sheets. For comparison purposes, the composite is measured against the Russell Midcap® Growth Index. The Russell Midcap® Growth Index is a market capitalization-weighted index of growth-oriented stocks of the 800 smallest companies in the Russell 1000® Index, which comprises the 1,000 largest U.S. companies. The index is calculated on a total-return basis with dividends reinvested. Benchmark returns are not covered by the report of the independent verifiers. The inception date of the composite is January 2012. The composite was created in January 2012. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The firm's list of composite descriptions, list of broad distribution pooled fund and the list of limited distribution pooled funds descriptions are available upon request.

The model management fee used for the net returns in this table is 1.30% for all periods presented. The standard Institutional management fee schedule currently in effect is as follows: 0.75% for the first \$25 million; 0.65% on the next \$25 million; 0.55% on the next \$50 million; 0.50% on the balance. The maximum Wealth Advisory Services Fee in effect is 1.30% for all assets, which breaks out as follows: 1.00% for the first \$3 million; 0.80% on the next \$2 million; 0.70% on the next \$5 million; 0.60% on the balance; with an additional

0.30% for any assets invested in separately managed accounts strategies. The standard investment advisory fee schedule currently in effect for clients not engaging in Wealth Advisory Services is 1.00%. Actual management fees charged may vary depending on applicable fee schedules and portfolio size, among other things. Additional information may be found in Part 2A of Form ADV, which is available on request. The performance information is supplied for reference. Past performance is no guarantee of future results. Results will vary among accounts. The U.S. dollar is the currency used to express performance. Returns are presented gross of management fees and withholding taxes and net of transaction fees and include the reinvestment of all income. Gross returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Model net returns have been calculated by deducting 1/12th of the highest tier of the standard management fee schedule in effect for the respective period from the gross composite returns on a monthly basis.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns for accounts in the composite for the entire year. For those years when less than five accounts were included for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation, which measures the variability of the composite (using gross returns) and the benchmark for the 36-month period, is not presented for periods prior to 2014 because 36 monthly composite returns are not available.

GLOSSARY

Alpha: A risk-adjusted measure of an investment's excess return relative to a benchmark. Beta: A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. R2: A measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Sharpe Ratio: A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. Standard Deviation: Measures variability of returns around the average return for an investment portfolio. Higher standard deviation suggests greater risk.

INDEX DEFINITION

The Russell Midcap® Growth Index is a market capitalization-weighted index of medium-capitalization, growth-oriented stocks of U.S. companies. The index is calculated on a total return basis with dividends reinvested. The index is unmanaged, its returns do not reflect any fees, expenses, or sales charges, and is not available for direct investment.
