

Global Small Cap Portfolio

Fourth Quarter 2025

Market Review

During the fourth quarter, technology stocks—and AI-related names in particular—remained in the spotlight, with much of the market’s attention focused on the sustainability of the rally and the scale of capital expenditures underway. Global equities advanced further during the quarter, with expectations for continued AI-related capital spending driving strong performance in sectors perceived to be AI beneficiaries, such as semiconductors and metals. Notably, higher risk appetites continued to drive outperformance of less profitable companies. Major indices, including the MSCI EAFE Index (+4.86%), MSCI Emerging Markets Index (+4.73%), the S&P 500 Index (+2.66%), and the Russell 2000 Index (+2.19%) posted positive returns in the fourth quarter.

Portfolio Review

The Global Small Cap portfolio underperformed the MSCI All Country World Small Cap Index in the fourth quarter. Poor stock selection and an underweight in communication services and poor stock selection and an overweight in industrials detracted from performance. An underweight in consumer discretionary and in consumer staples contributed positively to performance.

From a geographic perspective, poor stock selection and an overweight in Europe ex. U.K. and in the United Kingdom detracted from performance. Good stock selection and an overweight in Latin America and good stock selection and an underweight in Asia ex. Japan contributed positively to performance.

The biggest contributors to performance during the quarter were FinecoBank and Triumph Financial. FinecoBank is a savings platform in Italy offering a broad set of banking, brokerage, and wealth management services. The company continues to take wealth management and brokerage market share while management expects the banking segment to become an earnings growth contributor again in 2026. Triumph Financial’s payment network is growing and improving profitability despite a persistently weak transportation market. Other top contributors included Landstar System, Caixa Seguridade, and Haw Par.

The biggest detractors from performance during the quarter were Baltic Classifieds Group and Grupa Pracuj. Listed in London, Baltic Classifieds operates several online classified portals across the Baltic states of Lithuania, Latvia, and Estonia. Management guided to a near-term margin reduction as the company invests in integrating AI-based features into its platform, an announcement that led to a decline in the share price. Additionally, we believe share price underperformed due to investor concerns about the long-term impact of consumer-facing AI applications becoming the primary destination for searches. Grupa Pracuj is the leading job board in Poland. Our view is that the stock underperformed due to investor concerns about the long-term impact of consumer-facing AI applications becoming the primary destination for searches. Other bottom contributors included Rightmove, Auto Trader Group, and AJ Bell.

Purchases and Sales

During the quarter, we purchased Alliance Laundry, As One, FRP Advisory Group, Installed Building Products, and Kinsale Capital. Alliance Laundry offers a portfolio of premium laundry equipment brands across the Vended, On-Premise Laundry (OPL), and Commercial In-Home (CIH) markets. As One is the largest wholesaler of laboratory equipment in Japan. FRP Advisory is a restructuring advisory firm in the U.K. Installed Building Products is one of the nation’s largest installers of insulation in the residential new construction market. Kinsale Capital Group is a specialty property and casualty company focused on the excess and surplus lines market in the U.S.

We sold Auto Trader Group, Baltic Classifieds, Hemnet, Morningstar, NVE, and Rightmove.

Portfolio Highlights

Style: Small Cap
Index: MSCI® ACWI Small Cap Index
Portfolio Inception: 2016
Portfolio Assets: \$211.2 M*
Portfolio Turnover: 25%–35%
Number of Holdings: 30–60

Investment Philosophy

We believe that purchasing high-quality businesses with competitive protections at attractive valuations will achieve excess returns over a complete market cycle.

Investment Objectives

- To achieve a return meaningfully above that of the MSCI® ACWI Small Cap Index
- To achieve this return objective with a portfolio that exhibits lower overall risk characteristics

Market Characteristics		
\$ Weighted Average Market Cap—3-Year Avg.	\$4.4 B	\$4.6 B
Largest Market Cap—3-Year Avg.	\$12.1 B	\$1,490.7 B

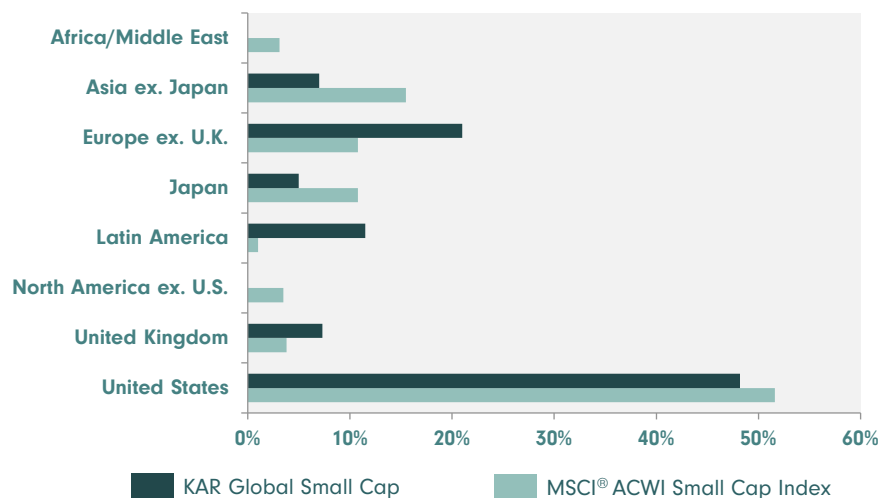

*KAR utilizes the interquartile method when calculating Debt/EBITDA. The interquartile method excludes outliers from an aggregate statistic such as weighted average. The interquartile method does not assume that data from the top or bottom of the distribution are outliers—only the extreme ends are excluded—and that it can be applied consistently as a quantitative method for most fundamental characteristics. Debt/EBITDA utilizes net debt for the calculation. †Dividend yield is a financial ratio that shows how much companies have paid out in dividends in the most recent year relative to their stock price at the end of such year. Dividend yield is being shown here as a characteristic of the stocks held in the portfolio and not to infer how the stocks have or will perform, as dividends are not the only component of the portfolio's performance. Dividends are subject to change from year-to-year, and the portfolio's dividend yield could be lower or higher in future years. Data is obtained from FactSet Research Systems and BNY Mellon and is assumed to be reliable. Other principal consultant firms may use different algorithms to calculate selected statistics. Estimates are based on certain assumptions and historical information.

Peer Comparison Chart

Inception* to December 31, 2025

The eVestment Global Small Cap Universe includes 46 managers categorized in the global small cap asset class by eVestment. KAR does not pay any fees to be included in the eVestment Global Small Cap Universe or for the ranking itself. KAR does pay fees for the use of certain products and services provided by eVestment. eVestment rankings are based on gross of fee returns. Gross of fee returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Management fees are described in KAR's Form ADV Part 2A, which is available upon request and can also be found at <https://kayne.com/wp-content/uploads/ADV-Part-2A.pdf>. Returns could be reduced or losses incurred due to currency fluctuations. **Past performance is no guarantee of future results.**

The MSCI® ACWI Small Cap Index is a trademark/service mark of MSCI®. MSCI® is a trademark of MSCI Inc.

KAR (as defined below) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. KAR has been independently verified for the period from January 1, 1999 through December 31, 2024.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis.

The Global Small Cap Composite has had a performance examination for the period from January 1, 2016 through December 31, 2024. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Kayne Anderson Rudnick Investment Management, LLC ("KAR"), a wholly owned subsidiary of Virtus Investment Partners, Inc., is a registered investment advisor under the Investment Advisers Act of 1940. Registration of an Investment Advisor does not imply any level of

skill or training. KAR manages a variety of equity and fixed-income strategies focusing exclusively on securities the firm defines as high quality.

The composite includes all fully discretionary institutional Global Small Cap Portfolios. Global Small Cap Portfolios are invested in equity securities with market capitalizations in line with the MSCI® ACWI Small Cap Index, that have market control, rising free cash flow, shareholder-oriented management, strong consistent profit growth and low-debt balance sheets. For comparison purposes, the composite is measured against the MSCI® ACWI Small Cap Index (net). The MSCI® ACWI Small Cap Index is a market capitalization-weighted index of small-capitalization stocks of the MSCI® Global Investable Market Indices Universe. The index is calculated on a total-return basis with dividends reinvested, net of withholding taxes. Benchmark returns are not covered by the report of the independent verifiers. The inception date of the composite is January 2016. The composite was created in January 2016. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The firm's list of composite descriptions, list of broad distribution pooled fund and the list of limited distribution pooled funds descriptions are available upon request.

The model management fee used for the net returns in this table is 0.90% for all periods presented. The standard management fee schedule currently in effect is as follows: 0.90% for

the first \$50 million; 0.80% on the next \$50 million; 0.70% on the next \$100 million; 0.60% on the balance. Actual management fees charged may vary depending on applicable fee schedules and portfolio size, among other things. Additional information may be found in Part 2A of Form ADV, which is available on request. The performance information is supplied for reference. Past performance is no guarantee of future results. Results will vary among accounts. The U.S. dollar is the currency used to express performance. Returns are presented net of withholding taxes, net of transaction fees and include the reinvestment of all income. Gross returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Model net returns have been calculated by deducting 1/12th of the highest tier of the standard management fee schedule in effect for the respective period from the gross composite returns on a monthly basis.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns for accounts in the composite for the entire year. For those years when less than five accounts were included for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation, which measures the variability of the composite (using gross returns) and the benchmark for the 36-month period, is not presented for periods prior to 2018 because 36 monthly composite returns are not available.

GLOSSARY: Alpha: A risk-adjusted measure of an investment's excess return relative to a benchmark. Sharpe Ratio: A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. Information Ratio: The information ratio (IR) is a measurement of portfolio returns beyond the returns of a benchmark, usually an index, compared to the volatility of those returns. Beta: A quantitative measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. Downside Capture Ratio: A statistical measure of an investment manager's overall performance in down-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has dropped. Tracking Error: The divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark. It is reported as a standard deviation percentage difference, which reports the difference between the return an investor receives and that of the benchmark they were attempting to imitate.
